

## BÜFA®-TEC DELTA EVO-LINE

Fibre Spray-, Gelcoat-, Laminating Roll- and RTM unit

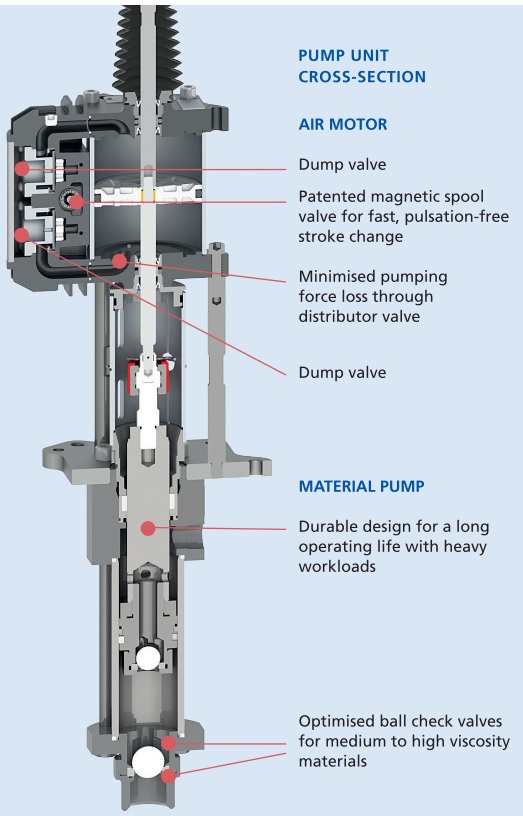

# Clear Set-Up & Individual Configuration

## BÜFA®-TEC DELTA EVO-LINE

The BÜFA®-Tec Delta resin and hardener pump is a reliable and durable pump unit that will give you high performance even in the most demanding production environments. The systems are designed for a long, reliable operating life and consist of sectional modules. The modular set-up allows fast maintenance with minimal downtime. With the appropriate tools, the Delta unit can be used as a fibre spray unit, gelcoat unit, laminating roll unit or RTM unit.

### TECHNICAL INFORMATION:

- Pressure ratio resin: 17:1
- Amount of peroxide: 1 - 3 %
- Flow rate per cycle: 126 ml
- Length of hose, e. g.: 10 m
- Output max. water @ 30 cycles 3.8 l/min
- Inlet air pressure max.: 6 bar
- Compressed air consumption: 500-900 l/min
- Innovative pump technology with self-adjusting packings
- Fast and easy maintenance of pumps through easy access to packings
- Less pulsation through quick action control valve technology in the air motor

The new EVO-Line trolley allows uncomplicated adaptation of the unit to meet your special production requirements.

The following tools and extensions are available for this:

- Boom for holding the hose package
- ATEX certified flow heater
- Different suction units (hobcock, drum and IBC)
- Different application tools

Get in touch with us if you are interested in further possibilities for adapting or expanding the unit.
